

# Cessna 172 Air Plains Performance Kit

Take a closer look at what sets Air Plains apart from the competition.

## POWERPLANT

Factory new Lycoming O-360-A4M engine equipped with roller tappets, Slick mags, wiring harness, spark plugs, carburetor and ring gear. New logbook and factory warranty. Air Plains has the **best** price and core exchange program.

## BAFFLE & SEAL KIT

New set of powdercoated baffles with seals attached. Engineered for reduced cylinder temperature and many hours of hassle free maintenance.

## AIRBOX

New airbox designed for a custom fit to the engine. with adapter plate, mounting hardware and gasket.

## PROPELLER

New propeller, spacer, mounting bolts and logbook. Comes in black or grey.

## Warranty

Factory new engine means factory warranty from Lycoming. Air Plains warranties it's kit components on an individual basis.

## Performance

Turn your Skyhawk into an extreme performer. Air Plains flight tests have proven 15-18 mph increase in cruise speed and 300-400 fpm increase in rate of climb!

## Gross Weight Increase

Gross weight increase of up to 250 lbs is available for Cessna 172 D through P equipped with Air Plains 180HP.

## Delivery

Air Plains provides an all encompassing kit that comes complete with STC Paperwork, step by step Installation Instructions and Drawings. Tech support provided on all ship out kits and continued STC support.
